Last update 01-2016. For further information please contact info@easescreen.com or visit our website www.easescreen.com

FRAME-SYNCHRONISED PLAYOUT

- > Frame-accurate synchronization of multiple media players with an unlimited number of displays
- > Content can be displayed on high resolution screens without loss of quality

INTEGRATION OF AUDIENCE MEASUREMENT SYSTEMS

- > Quividi measures the (advertising) impact of Digital Signage systems and campaigns
- > easescreen fully evaluates the analysis data from the Quividi software
- > Tracking the effectiveness and success of (advertising) content in detail at any time
- > Extended logging and interactivity related to audience

INTEGRATION OF A VIDEO CLIENT

- > The video client enables high performance video communication within easescreen
- > SD or HD video calls right from the POV Client by simply pressing a button
- > It can be used in the form of an information terminal as a "digital adviser" or in office buildings as a "digital concierge"
