

ALWAYS BRIGHT

LEDECA®

Since 2007, we manufacture, deliver and integrate high quality LED based multimedia solutions across multiple vertical markets, which includes but are not limited to; outdoor advertisement, out-of-home messaging, traffic variable messaging, rental, broadcast, sports and media facade applications.

As of 2019, our installed based of screens number over 10.000 distributed across 50 countries. We complement our LED multimedia products with supplementary offerings where necessary, such as monitoring system, display processors, content automation software, turnkey project design & build & calibration services.

Our philosophy is dedication and constant improvement in the LED display business, in order to provide the best possible value to our customers and competitiveness to our partners with turnkey solutions.

LEDECA, always bright!

WE ANALYSE

We understand your requirements

WE DESIGN

Create the most suitable and cost effective solution with engineering and industrial experience

WE PROVIDE SOLUTION

We deliver and execute the turnkey solution

WHO WE ARE

Apron Teknoloji is a turnkey LED screen manufacturer who was born in 2007, 4.000sqm manufacturing base, operations and subsidiaries in all over the world and best projects and solutions which are best in their own area. To focus on turnkey solution! This is the key of our success. We listen to you, analyze your demands, find solutions with our professional team whose target is to catch the optimum point between cost and performance.

OUR TEAM

LEDECA was born in Technopark at University of Erciyes. That gives us power for continuous improvement with young and well educated human resource under orientation of academic management.

OFF THE SHELF STANDARDIZED

We provide standardized, off-the-shelf products that are optimized for application. Thus, we can offer the most suitable product per application, achieve standardization of quality, and provide fast turn around to inquiries.

Where required, we do design and provide turnkey projects with all necessary supplementary products including frame design for any kind of metal construction and adaptation, hardware, software, substructure and services.

Just pixel pitch is not enough to talk about led screens. You can see many of our products before making a decision, ask questions that are in your mind, see the difference of LEDECA with your own eyes.

SUBSIDIARIES

PARYA METAL AS, as subsidiary company of LEDECA; provides a solution-oriented production service for your any kind of indoor & outdoor projects with its innovative concept of advertising and city furnishing industry, design and produce metal constructions. PARYA has over 10 years of operational history as a supplier of brands built across Europe, Africa and Asia.

ALTUM TEKNOLOJİ AS, as subsidiary company of LEDECA; provides signal management equipment where necessary, and includes single or multi channel scalars, video processors, signal extenders, converters, content management software and LED wall controllers.

PRODUCTION

We have complete control over all mechanical and electronic aspects of the production process. Our products are compliant with CE, LVD, EMC, RoHS standards. Apron Teknoloji has fully ESD compliant production area and all the products are protected for Electro Static Discharges. Not only ESD, but also all steps and processes take action according to IPC standards.

AGING

The most important QC step is "aging". That's not only to find errors seen in this step, but also it's important to adjust future production adjustment coz of sustainable 100% success. Products tested for 72 hours, faults that may occur during aging test are eliminated once after that step.

CALIBRATION

All our products are tested and calibrated for uniformity of color and brightness before leaving the factory. We do also provide periodic after-sales calibration services.

FRAMEWORK

We utilize the experience of our mother company in metalworking to construct the framework and construction necessary for your LED screens. We are able to design and build non standard curved, spherical or any other custom shaped framework.

SAFETY

"Safety first"! is a key principle at LEDECA. Human safety comes first and is more important than anything else. We focus on safety on each step of the production process. Our facilities have the most current ISO standards in operational and environmental safety.

INSTALLATION

Small or huge screen, located in indoor or outdoor, from snowy mountains to deserts, wherever you are in Europe, Asia or Africa, whatever your project is retail, stadium or facade... We will be there for your turnkey demands .

over 50 countries and over 10.000 screens;
all turnkey solutions...

LEDSCREEN SOLUTIONS

No matter the sector and the application, no matter the requirements, whether it is for one or one thousand square meters, whether it's a single screen or a network of one hundred points, we can provide the right LED solution at the right price-performance point. This is our core business.

Our products are currently used in the following markets: OOH advertising, retail, digital city furniture, traffic, sport, broadcast, etc. We have standard off-the-shelf products that are optimized for these markets, and further we are able to create custom design products for a specific purpose or project.

TURNKEY SOLUTION

The challenge here is to send the right info at the right time to the right target audience. We can design and install centrally managed digital signage networks that could be as large as hundreds of displays made up of different types.

CONTENT MANAGEMENT SOFTWARE

EASESCREEN, our strategic partner, offers you several distinct advantages when compared to other digital broadcasting and information solutions.

Rich content management and convenient report monitoring features, customized messages for your target audience, easy integration of different content into different applications on multiple media, offering excellence by combining rich media content with interactive broadcasts.

AGING

The most important QC step is "aging". That's not only to find errors seen in this step, but also it's important to adjust future production adjustment coz of sustainable 100% success. Products tested for 72 hours, faults that may occur during aging test are eliminated once after that step.

OUTDOOR ADVERTISEMENT

CITYLINE

Outdoor LED screens specialized for outdoor advertising and out-of-home messaging. High brightness, rugged construction, able to function in tough environments.

GALLERY

Indoor and semi outdoor LED screens specialized for retail. Featuring high brightness values so that they can be placed in daylight or under sunlight (storefronts) low power consumption, silent operation.

RETAILING

ULTRA

Indoor LED screens for TV studios. Very high pixel density, silent operation, high refresh rate (so as not to cause artifacts in recordings).

MEDIA BROADCAST

ARENA

Indoor and outdoor LED screens customized for sports venues. Scoreboards, scorecards, perimeter screens. FIBA and UEFA certified where necessary.

SPORTS

LIMITLESS DESIGN

FREEFORM

Flexible indoor and outdoor LED screens that can be built in custom shapes and forms. Use them to give life to your creative designs.

STAGE

Indoor and outdoor LED screen solutions optimized for live events and rental companies. High brightness and rugged construction that allows repeated installations.

SCREENS FOR MICE & STAGE INDUSTRY

LEDUP

Plug&Play LED displays, lightweight, easy to move, easy to manage your contents via mobile phone, cloud software or via direct computer connection, just plug&play.

FACADE

Architectural semi transparent LED wall curtains, that allow you to convert your building's glass surfaces without blocking the view of the tenants.

CITYLIGHT

Citylight product convert your building's facade to colorful dynamic LED walls with real video capability. Product range has installation solution for any kind of building facade.

DOOH

Standardized outdoor city furniture such as billboard, totem, outdoor kiosk and other message signs. High brightness and affordable price.

FIDS

When you need 100% stability and 100% reliability, when you need your display keep working in any condition; LEDECA FIDS display designed for you. Not only display but also able to establish any kind of communication integration with your system.

TRAFFIC

Variable Message and Traffic Signs designed for highway and traffic management, Compliant with the international standards on display systems for motorways.

ULTRA

HIGHEST STABILITY, MAXIMUM PERFORMANCE
INDOOR LED SCREENS FOR HIGH GRADE & HIGH
RESOLUTION LED WALLS

ANKARA BROADCAST STUDIO
ANKARA / TURKEY

Ultra quality for ultra high definition requirements

Optimized for broadcast studio installations

Fanless design without noise

Super high gray scale and refresh rate

High reliability and stability for 7/24 operation

Special mask design to reduce moir effect in broadcast studio projects

LED SCREENS FOR STAGE,
EVENT AND RENTAL
INDUSTRIES

OUTDOOR EVENT MOSCOW/RUSSIA

- Quick maintenance within 20 seconds
- Structure that facilitates easy installation
- Aluminum structure with passive cooling and fanless design
- Reinforced module structure suitable for continuous disassembly and installation
- Production level calibration for best color uniformity
- All models have 500x500mm panel options
- Strong structure supporting +10 and -10 degree curving

SMART LINE

"Backup function improves product stability, which is more evident in high-rise building applications"

Minimal installation, adapt to all types of buildings, without damaging the original building facade and structure

Easy to install all kinds of creative shapes

SMART DOT

Separate design of lamp body and cable for easy of on-site maintenance

Easy to install all kinds of creative shape (inner arc, outer arc, shaped...)

Environmentally adaptable, all-weather use

Minimal installation, adapt to all types of buildings, without damaging the original building facade and structure

DATA COLLECTION TERMINAL LT210

It is a data collection and monitoring device used to monitor, record, and control the environmental variables (temperature, humidity, smoke, air flow, water leak etc.) of the LED WALL to be monitored. LTS 210 does not need any PC / Server connection to work. Easy to install, flexible and reliable service.

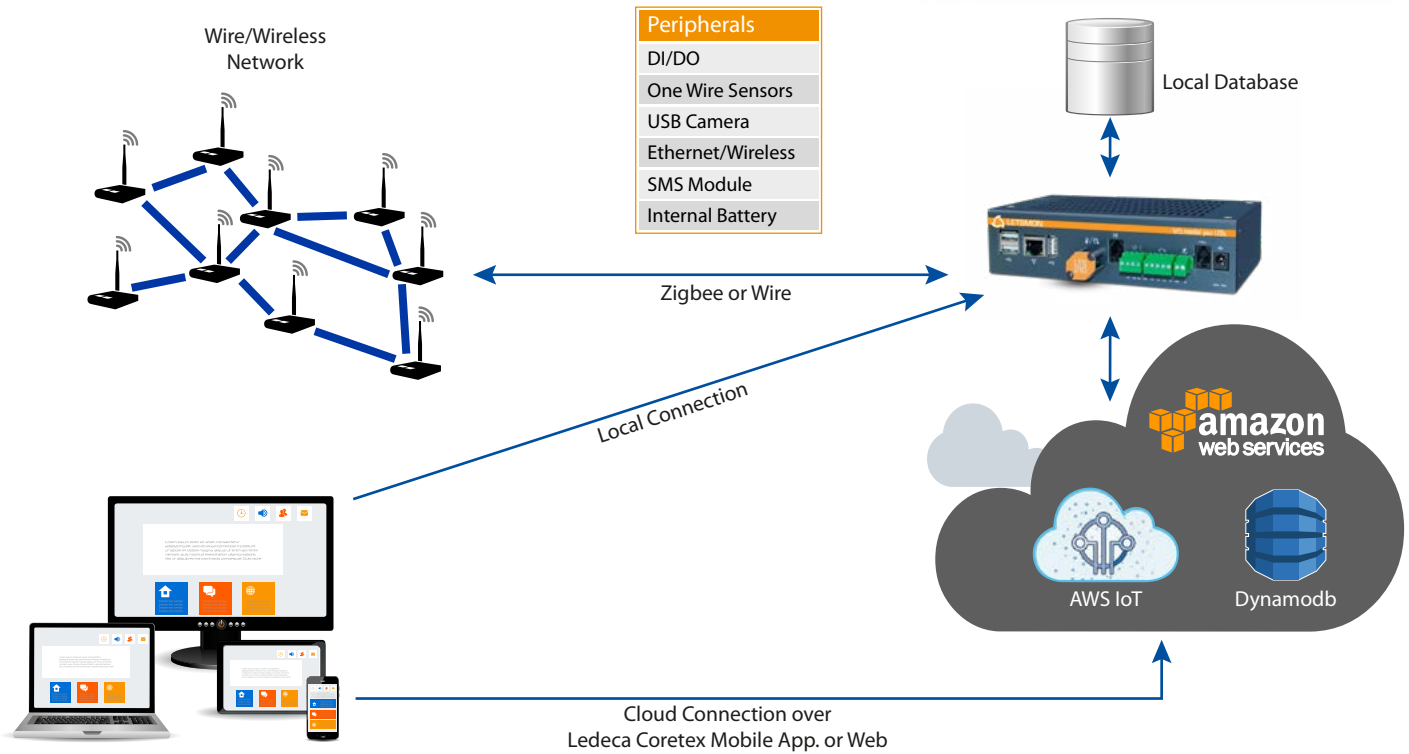

You can remote monitoring with safety Web access from anywhere in the world with LETSMON EMS. You will be immediately notified of alarm notifications from many ways such as E-mail, SMS, Phone call,

SNMP trap. All data collected from sensors can be saved, used for reporting and analysis.

The data collected by the Data Collection Terminal and the connection established with the user are secured by advanced encryption algorithms. You can live view from the remote by connecting a compatible IP Camera or a compatible USB WebCam to the terminal. You can send a photo of your choice to an email address that you specify.

TECHNICAL SPECIFICATIONS

Integrated Temperature and Humidity Sensor	YES (1 Pcs)
Integrated Temperature Sensor Measurement Range	0/+60 °C
Integrated Temperature Sensor Sensitivity	Precision < %0.5
Integrated Humidity Sensor Measurement Range	Relative Humidity 0 - 100
Integrated Humidity Sensor Sensitivity	Precision < %3
Integrated Water Fugitive Sensor	YES (1 Pcs)
RJ9-Digital Sensor Port (1-Wire)	1 Port (Max. 16 Port 1-Wire Sensor)
Max. 1-Wire Sensor Distance	50 m
Digital Input	4 Inputs (5 - 24 VDC)
Digital Output	2 Outputs (Max. 250 VAC/ 30 VDC)
USB 2.0 Port	4 Ports
HDMI Output	1 Output
Integrated IR Port (Air Conditioning Control)	LETSMON IR with Module
External HDD, Keyboard, Mouse Connection	USB
Supply Voltage	5,8 V (DC) 3 A
10/100 Ethernet	1 Ethernet Port
Power Consumption	10 W
Operating Temperature Range	0-60 °C
Operating Humidity Range	%10 - %90 (non-Condensing)
Physical Measures	170mm x 94,5mm x 44,4mm
Weight	522 gr
EMC Certificate	IEC 61000-6-4 / IEC 61000-6-2
Product Warranty	2 Years
Network Protocols	HTTP, SNMP Traps, TCP Socket IO, MQTT, Modbus TCP, Modbus RTU, WEIGAND (Lock Settings), FTP, SSH, TELNET

LETSMON

Let's monitor your system! Environmental monitoring system, to keep under control for everything you want. It is a system that control, analyze and watch the significant environmental factors such as temperature, humidity, light, smoke, air conditioning. The sensors help the system to collect and save the data, then you can easily access your reports. This system can create performance graphics and identify the resource needs.

CONNECTIVITY

DEVICES

- PDU
- Generator
- UPS
- Air Conditioner
- Energy Analyser
- IP Camera

PERIPHERALS

- Phone Caller
- Monitor
- Backup Battery
- SMS Module
- 3G Modem

SENSORS

- TEMPERATURE
- HUMIDITY
- LIGHT
- FLOOD SENSOR
- DOOR OPEN
- MOTION DETECTION
- FIRE
- ELECTRICITY
- SMOKE

FRAMEWORK DESIGN AND PRODUCTION

Turnkey Frameworks and scaffolding for any conceivable LED screen application. We start by listening to our clients and determine project requirements. We determine the optimum and sustainable solution for our client

Our pre-sales team outlines the project. Our aim is to provide the solution at the best price, without compromising engineering and esthetic principles. Our priority is to make the project differentiate from competitors and provide an advantage to our client

All production is made by us in our 40.000 sqm factory, and installation is done by our own personnel. We have local installation teams situated around Europe. All required electricity communication and management infrastructure are provided by us. You just need to turn "ON"

Our design team models the project in 3D and presents it for the client's approval and for static validation.

LIMITLESS IMAGINATION WITH REAL 3D EFFECT*

TECHNICAL SPECIFICATIONS

Loading capacity up to 4Kx1K in 3D mode per device

You could experience super-large 3D image on your LED display with 3D glasses

Easily enjoy the immersive 3D experience with long battery life active-shutter 3D glasses, supporting various video inputs

Multiport charging station for 3D glasses

One-click switching between 2D and 3D mode

3D control device supports maximum 30 meters communication distance for each 3D glasses

(*) Please contact LEDECA to ask supported LED screen specifications

NOT AN OEM BUT A REAL MANUFACTURER

We have our own factory and we manufacture our own products. This gives us the flexibility to create the product we want, in contrast to rebranding the product that is available. It also gives us total control over quality, in all phases of manufacture.

OFF-THE-SHELF STANDARDIZED PRODUCTS

We provide standardized, off-the-shelf products that are optimized for application. Thus, we can offer the most suitable product per application, achieve standardization of quality, and provide fast turn around to inquiries.

QUALITY

We use components and manufacturing standards suitable for industrial operation and the requirements of the application, even inside our most cost effective product, is one of our main principles. All our products have CE certificate.

CUSTOM DESIGN FREE FORM PRODUCTS

The fact that we have a standardized product portfolio, does not mean we are not unresponsive to special requests. We are able to design and manufacture any size, shape and LED video product for custom, non-standard requirements.

NOT JUST PRODUCT BUT SOLUTION

We do not just install the screen and leave. We also design where required, any necessary supplementary system, such as the video distribution and processing network, or the content management solution.

SERVICES

Our approach to customer management is based on total solution rather than simple equipment sales. Our optional services include calibration, content design, remote monitoring and direct operation of the system.

ADVANCED CONSTRUCTION TECHNOLOGY

Using the skills and experience of our parent company which is dedicated & specialized in metal construction, we are able to handle the design and implementation of complex and difficult constructions, that are beyond the skills of most LED installers.

SOLUTIONS FOR MULTIPLE VERTICAL MARKETS

The extensive professional experience of our team and our group companies, allows us to produce solutions for most vertical markets where LED display solutions are required, ranging from sports to event rentals, open air advertising to highways, broadcast to retail. Solution partners that work with us, are never left without solution.

CONFIDENCE OF GLOBAL BRANDS

SHELL, TOTAL, BP, GULF, OPEL, MERCEDES, DAEWOO, VODAFONE and many other such global brands trust us. And we start each day trying to live up to that trust.

COMPETITIVENESS

We work with a team that is small compared to its achievements. We constantly follow new technologies and improve our methods. We have the cutting edge in competitiveness, in the price-performance range that we provide. Contact us and let us demonstrate it to you as well.
