

AC series and WT series Supported Touch Panels

Models: AC25, AC45, WT20

1. Introduction

Next-gen interactive meeting room solution with Wireless Touch solution. Part of Wireless Multi-Touch Back Control system, WT20 is a module that enables presenters to engage with meeting materials readily available on their laptops real-time directly on multi-touch displays. WT20 is compatible with screens that support 10-point multi-touch, Infrared (IR) touch, capacitive touch and In-Glass touch.

Herewith key features:

- ▶ Wireless 4K Touch Solution
- ▶ Wireless 10 points touch
- ▶ Support Windows and Mac OS
- ▶ Compatible for all major Touch Displays
- ▶ True Plug and Play
- ▶ No Software or Driver
- ▶ High Speed Touch without delay
- ▶ Support Extension Touch Display
- ▶ Full back channel Control of computer

2. List of supported touch screens and panels

The following list is a non-exhaustive list of touch panels and touch controllers, positively tested by NorthVision own R&D team, Sales partners community and supported by the VisionShare AC25, AC45 and WT20 models.

Please verify whether the touch panel connected is listed below. In case the touch panel manufacturer is not mentioned by name, please verify whether the panel is using a supported controller listed below.

Note that the compatibility of some touch panels has not been verified by NorthVision's own R&D testing team. NorthVision cannot guarantee the full functionality in all use cases. The list will continue to update from time to time.

- 3M PCT touch screens
- Avocor touch panels
- BenQ Interactive Displays
- CTouch touch screens
- CVTouch panels
- Dell touch screens
- FlatFrog In-Glass Touch panels
- Iiyama touch panels
- NEC touch display
- NorthVision VisionBoard touch screens
- Newline touch panels
- SMART Board touch panels
- Samsung Flip Chart panels
- Sharp Touch panels
- ViewSonic ViewBoard Interactive Displays

3. What if your touch display panel is not listed

The touch drivers used by our NorthVision Host Base Unit are generic, and therefore there is a high probability that your touch screen will work as expected. In most cases your touch display will work just fine. To avoid any purchase risk, please contact NorthVision or our sales partner with all information with respect to the screen so we can arrange for an investigation or even an on-site tryout.
