\* Requires installation of appropriate codecs for Microsoft Windows / \* for Brightsign: as supported by Brightsign-hardware  
 \*\* Sub-layers are necessary e.g. in order to allocate user-rights to certain partitions of the screen.  
 \*\*\* The feature easescreen eSign gets licensed together with the eSign Server and allows for web-based room-booking.  
 \*\*\*\* The easescreen event "analog/digital TV" and the integration of sensors require hardware certified by easescreen.  
 \*\*\*\*\* Must be supported by the used output device (RS232) and the output device must be implemented in easescreen.

○ optionally available for additional charge  
 ● standard feature
