

# i3SYNC TOUCH

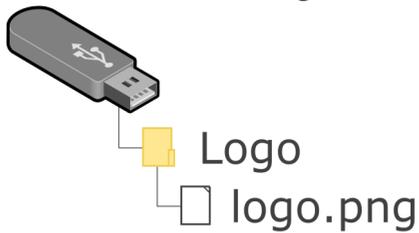

How to insert a company logo ?

(firmware version 1.0.5 or higher)

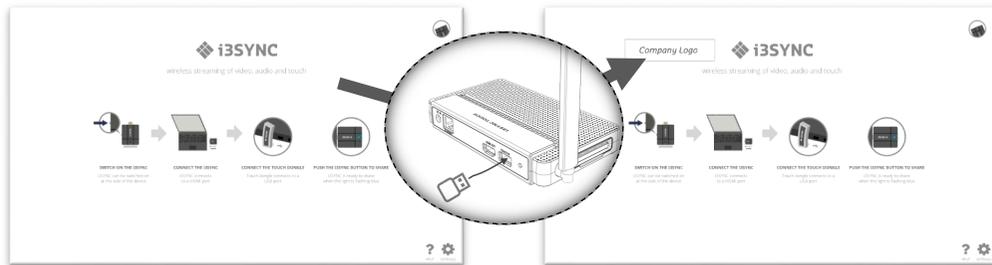

Create an image file of  
380 by 93 pixels

Save the image containing the desired company logo as  
.png , .jpg , or .bmp  
Inside a "Logo" folder on a formatted USB thumb drive.

While on the Home Screen of the i3SYNC,  
insert the USB thumb drive in the USB port of the i3SYNC receiver.

The company logo will automatically be loaded onto the background.
