

## XR ANTENNA RECTANGULAR SHAPE

### XR range

The nexmosphere XR-Range offers a range of wireless pick-up solutions. Although the RFID technology is not new, the way the XR-Range offers ease of use in the shopper experience is a true innovation. Use the standard market-available RFID tags to earmark your product. When the product is close to the antenna, it will be registered and can trigger any event on the connected Xperience controller, such as a video, to start or an audio track to play.

The XR-antenna is an ultra slim, easy to build in RFID antenna. It can be hidden behind a variety of materials like wood, acrylic, or even cardboard. Choose your detection surface size and there will be an antenna that fits your application. Use the XR-antenna driver to connect the antenna to any of the nexmosphere Xperience controllers.

### Features

- Ultra-thin form factor
- Wireless pick-up detection surface

### XR-Antenna Interface

The antenna driver can be easily connected to any of the nexmosphere Xperience controllers using the X-talk interface. All settings of the XR-Antenna driver are programmable on the controller side, enabling a seamless integration in your application. Connect any of the XR-antennas to the driver to read the RFID tag.

- Plug and smile interface
- Compatible with any nexmosphere antenna interface
- Powered and programmable by the nexmosphere Xperience controller for ease of use

### Wireless pick-up detection

The antenna registers the pick-up of the merchandise (with the RFID tag) as well as putting it back on the shelf (place-down). Both events can be used as triggers on the Xperience controller, for example, to start a video or illuminate a string of LEDs. The Xperience controller can also run statistics, showing you which products are often picked and which are the less preferred ones, providing you a valuable insight into shopping behavior.

- Pick-up and place-down registration
- Highly responsive
- Compatible with all nexmosphere RFID tags

### RFID tag

The nexmosphere RFID tag is a low-cost ultra thin sticker (foil) with an onboard chip, similar to the labels used for merchandise security. The RFID tags can have different identification numbers enabling the Xperience controller to identify the product that is picked.

- No mechanical moving parts that can break by intense use due to wireless detection
- Low cost tag
- Multiple tag detection (up to 4 RFID tags simultaneously)

### Benefits

- Multiple data gathering functionalities of the Xperience controller offer a unique insight into how your application is being used
- Availability of a wide range of differently sized antennas
- Auto-calibration and autostart for highly reliable applications (24/7)

## XR ANTENNA RECTANGULAR SHAPE

### Thermal specifications

Operating temperature: +10°C...+40°C/ +50°F ... +104°F  
Storage temperature: -20°C...+50°C/ -4°F ... +122°F

### Mounting specifications

- Keep away from metal objects or surfaces
- Antenna spacing of minimum 200 mm is advised
- Maximum material thickness 10–30 mm depending on the material
- Works on glass, acrylic, wood, cardboard, stone, and non-metallic materials

### Standards and Certifications

Compliant with IEC 60950-1(ed.2);am1;am2  
CE certificate  
US/CAN certification in progress  
RoHS compliant

### Miscellaneous

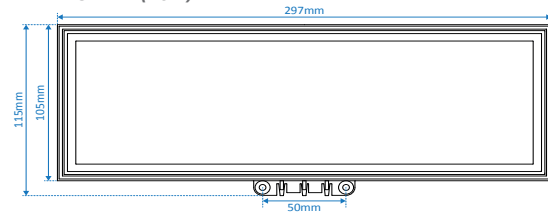

- Customized layouts and board shapes available on request

### Packaging

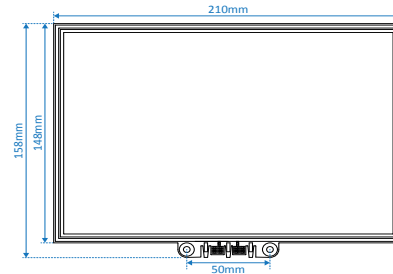

Items per carton 1, 10 or 50 pcs

### Mechanical dimensions

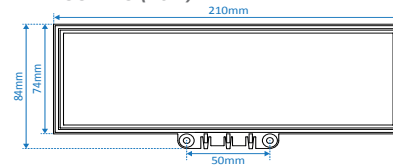

#### XR-A45 / A4 (half)

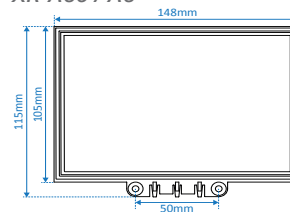

#### XR-A50 / A5

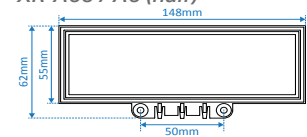

#### XR-A55 / A5 (half)

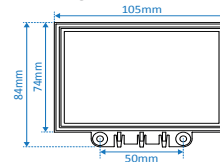

#### XR-A60 / A6

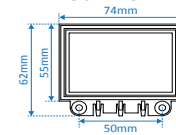

#### XR-A65 / A6 (half)

#### XR-A70 / A7

#### XR-A80 / A8

### Ordering information

| Product ID | Description                                  | Quantity |
|------------|--|----------|
| XR-A45     | RFID antenna rectangular A4 (half) 297x105mm | 1 pc     |
| XR-A50     | RFID antenna rectangular A5 210x148mm        | 1 pc     |
| XR-A55     | RFID antenna rectangular A5 (half) 210x74mm  | 1 pc     |
| XR-A60     | RFID antenna rectangular A6 148x105mm        | 1 pc     |
| XR-A65     | RFID antenna rectangular A6 (half) 148x52mm  | 1 pc     |
| XR-A70     | RFID antenna rectangular A7 105x74mm         | 1 pc     |
| XR-A80     | RFID antenna rectangular A8 74x52mm          | 1 pc     |
